

GLADIATOR MD™ CERVICAL

POWERED BY
SEMICERA®
TECHNOLOGY

RECOVERY *at the speed of light*

The **Gladiator MD™ Cervical Device** has been proven beneficial for reducing pain and inflammation, while increasing circulation and cellular regeneration. The technology is well suited for soft tissue stress due to posture, aging joints, and recovery from injuries.

Featuring patented **SemiCera® technology**, the device uses the patient's ambient body heat to passively activate the embedded far infrared ceramics. The subsequent emitted photons create intracellular vibration that stimulates the body's natural healing processes.

Ideal for easing neck discomfort and accelerating healing.
